RE: Phase I Environmental Site Assessment, Natchez Gym, 200 School St., Washoe County Assessor  
Parcel Number 084-200-37, Wadsworth, Nevada

Dear Ms. Donna Noel:

Provided herein is the report entitled *Phase I Environmental Site Assessment, Natchez Gym, 200 School St., Washoe County Assessor Parcel Number 084-200-37, Wadsworth, Nevada*. This report includes a description of activities conducted and results obtained from the assessment.

Should you have questions or require additional information, please do not hesitate to contact us.

Sincerely,

BROADBENT & ASSOCIATES, INC.

Brandon Reiff, PG, CEM #2300 (exp. 3/23/24)  
Senior Geologist

## Executive Summary

To assist Pyramid Lake Paiute Tribe with its due diligence efforts, Broadbent & Associates, Inc. has conducted this Phase I Environmental Site Assessment (ESA) on the real property located at 200 School St., Washoe County Assessor Parcel Number 084-200-37, Wadsworth, Nevada (Subject Property). This ESA was conducted in conformance with the scope and limitations of ASTM Practice E1527-21: *Standard Practice for Environmental Site Assessments – Phase I Environmental Site Assessment Process*, and the United States Environmental Protection Agency (EPA) final rule contained within Code of Federal Regulations Volume 40 Part 312 – *Standards and Practices for All Appropriate Inquiries*. Exceptions to, or deletions from, this practice are described in Section 1 of this report. Use of the referenced ASTM Process is intended to satisfy requirements for conducting “all appropriate inquiries” (AAI) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The following table provides a breakdown of the findings of this Phase I ESA:

Report Section		REC (Y/N)	CREC (Y/N)	HREC (Y/N)	De Minimis Conditions (Y/N)	Comments
2.0	Site Description	N	N	N	N	The Subject Property building is currently a gymnasium.
3.0	User-Provided Information	N	N	N	N	The Subject Property is currently a gymnasium.  No known environmental liens or contamination.
4.0	Site Reconnaissance	N	N	N	N	Septic system located on the Subject Property.  Approximate 1,000-gallon propane AST is located on the Subject Property.
5.2	Historical Records	N	N	N	N	The Subject Property building was constructed in 1935.
5.3	Regulatory Records	N	N	N	N	No known releases and/or environmental cases are associated with the Subject Property at the time of this report.
5.4	Vapor Intrusion	N	N	N	N	None.
5.5	Other Environmental Records	N	N	N	N	No known environmental liens or contamination.  Active septic system on the Subject Property.

6.0	Non-Scope Considerations	N	N	N	N	BERs associated with asbestos-containing material (ACM) and lead-based paint (LBP) are identified for the existing building on the Subject Property.
7.0	Interviews	N	N	N	N	No known environmental contamination or liens.

**Site Description and Use:**

The Subject Property’s current physical address is 200 School St., Wadsworth, Nevada 89442. The Subject Property consists of a single parcel assigned Washoe County Assessor’s Parcel Number 084-200-37. The Subject Property is currently occupied by Natchez Gym.

**Site Reconnaissance:**

The site reconnaissance of the Subject Property was performed on July 3, 2023, by Mr. Brandon Reiff of Broadbent & Associates.

**Historical Information:**

The current building on the Subject Property was built in 1935.

**Records Review:**

The Subject Property was not listed in any of the databases that were searched.

File review of Washoe County Health Department’s (WCHD’s) septic records indicate that a 1,000-gallon septic tank was installed on the Subject Property on April 25, 2000. WCHD issued permit #3570 for the septic system on the Subject Property.

**Conclusions:**

This assessment has revealed no recognized environmental conditions (RECs) in connection with the Subject Property. However, this assessment has revealed non-scope business environmental risks (BERs) in connection with the Subject Property. BERs associated with asbestos-containing material (ACM) and lead-based paint (LBP) are identified for the existing building on the Subject Property based on the following:

- Age of the buildings and the potential for presence of ACMs and/or LBP;
- Unknown condition of structural materials potentially containing ACMs and/or LBP.

For ACM, should renovation and/or demolition activities be undertaken, then it is recommended that an Asbestos Demolition/Renovation Survey be completed and that all ACM that will be impacted by the demolition and/or renovation be properly abated to comply with federal and state regulations. For LBP, it is recommended that any area to be disturbed be checked prior to disturbance to be in compliance with Nevada lead regulation requirements.

## Section 1: Introduction

---

This section describes the purpose of and authorization for conducting this assessment. Also discussed are significant assumptions, deviations, special terms and conditions, and user reliance on this report.

### 1.1 Purpose

To assist the Pyramid Lake Paiute Tribe (PLPT) with its due diligence efforts relative to the Natchez Gym located at 200 School St., Washoe County Assessor Parcel Number 084-200-37 in Wadsworth, Nevada (Subject Property), Broadbent & Associates, Inc. (Broadbent) conducted an All Appropriate Inquiry Phase I Environmental Site Assessment (ESA) consistent with the ASTM International Standard E1527-21: *Standard Practice for Environmental Site Assessments – Phase I Environmental Site Assessment Process*, and the United States Environmental Protection Agency (EPA) final rule contained within Code of Federal Regulations (CFR) Volume 40 Part 312 – *Standards and Practices for All Appropriate Inquiries (AAI)*. The purpose of this due diligence investigation is to identify recognized environmental conditions (RECs) in connection with the Subject Property.

A REC is defined by ASTM International as:

*“(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.”*

A CREC is defined by ASTM International as:

*“REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.”*

A HREC is defined by ASTM International as:

*“A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A HREC is not a REC.”*

A *De Minimis Condition* is defined by ASTM International as:

*“A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs nor CRECs.”*

### 1.2 Scope of Work

Various investigative methods were utilized to complete this ESA. Specific items accomplished include the following:

- Prepared a general site description,

- Reviewed User-provided information,
- Conducted a site reconnaissance,
- Reviewed historical resources such as: property records, topographic maps, aerial photographs, fire insurance maps, and city directory listings,
- Reviewed readily ascertainable environmental records,
- Review of previous environmental site assessments, if made available,
- Conducted interviews,
- Identified data gaps (if present), and
- Prepared this ESA report summarizing assessment results.

### **1.3 Significant Assumptions**

Conclusions stated in this report are based upon observations made by employees of Broadbent and also upon information provided by others. It is assumed that these observations and information are accurate. However, Broadbent cannot be held responsible for the accuracy of the information provided by others. The scope of this ESA does not purport to encompass every report, record, or other form of documentation relevant to the Subject Property being evaluated.

### **1.4 Deviations**

There were no deviations from the ASTM International standards.

### **1.5 Special Terms and Conditions**

Observations contained within this assessment are based upon Subject Property conditions readily visible and present at the time of the site reconnaissance. These Subject Property observations are unable to specifically identify conditions of potential mold, asbestos containing building materials, subsurface soil, groundwater, vapor, or underground storage tanks, unless specifically mentioned. This ESA does not attempt to address the unidentified past or forecast future Subject Property conditions.

### **1.6 Reliance**

The enclosed ESA has been conducted for the exclusive use of the Pyramid Lake Paiute Tribe and may not be reproduced, distributed, or relied upon by others without the prior written authorization of the Pyramid Lake Paiute Tribe and Broadbent. A Reliance Letter can be prepared for additional use upon request by the Pyramid Lake Paiute Tribe.

## Section 2: Site Description

This section describes the Subject Property with its location and legal description, general vicinity characteristics, current uses, description of on-site improvements, and current uses of adjoining properties.

### 2.1 Location and Legal Description

The Subject Property is located within the incorporated limits of Wadsworth, Nevada. The Subject Property's current physical address is 200 School St., Wadsworth, Nevada 89442. The Subject Property consists of a single parcel assigned Washoe County Assessor's Parcel Number 084-200-37. A copy of the Washoe County Assessor's Parcel Map for the Subject Property is provided in Appendix A.

Approximate latitude and longitude coordinates for the center of the Subject Property are 39.6347080° North, 119.2834460° West NAD83. The Subject Property is located within the northwest ¼, Section 3, Township 20 North, Range 24 East, relative to the Mount Diablo Baseline and Meridian. The Subject Property is covered by the United States Geological Survey (USGS) 11881856 Wadsworth, NV 7.5-minute quadrangle topographic map. A Site Location Map and Property Location Map are provided as Figures 1 and 2, respectively.

### 2.2 Current Uses of the Site

The Subject Property is currently a school gymnasium. The Subject Property is currently occupied by Natchez Gym.

No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of current uses of the Subject Property.

### 2.3 Description of Structures, Roads, and Other Improvements

The Subject Property has a single story, gymnasium building structure covering approximately 5,000 square feet. The structure is constructed of concrete block with stucco exterior walls with masonry framing. The heating and cooling system for the Subject Property building is provided by space heaters. The Subject Property building was constructed in 1935. Additional Subject Property information is provided in the table below.

<b>Size of Subject Property (approximate)</b>	According to the Washoe County Assessor, the approximate size of the Subject Property parcel is 0.739 acres.
<b>General Topography of Subject Property</b>	The Subject Property has a gradual downward slope to the east-northeast.
<b>Adjoining and/or Access/Egress Roads</b>	The Subject Property is accessible by entrances/exits on the western side via School St., the northern side via Bridge St., and the eastern side via Virginia St.
<b>Paved or Concrete Areas (including parking)</b>	A concrete walkway is located on the Subject Property.
<b>Unimproved Areas</b>	There are no known unimproved areas.
<b>Landscaped Areas</b>	There are no significant landscaped areas on the Subject Property.
<b>Surface Water</b>	The Truckee River is approximately 200 feet east of the Subject Property. No surface water was observed on the Subject Property.
<b>Potable Water Source</b>	Truckee Meadows Water Authority
<b>Sanitary Sewer Utility</b>	Septic System (1,000 gallon tank)

<b>Storm Sewer Utility</b>	Washoe County
<b>Electrical Utility</b>	NV Energy
<b>Natural Gas Utility</b>	NV Energy

No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of structures, roads and other improvements to the Subject Property. However, Business Environmental Risks (BERs) were identified relative to the Subject Property based on review of the building structure’s ages on the Subject Property. These BERs are further discussed in Sections 6.2 and 6.3.

BERs are defined by ASTM as "a risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

## 2.4 Current Uses of Adjoining Properties

Adjoining properties are used for various purposes. Uses of adjoining properties as observed during the site reconnaissance performed on July 3, 2023 include the following:

<b>Direction</b>	<b>Address</b>	<b>Occupant</b>	<b>Use</b>	<b>Comments</b>
North	N/A None	None None	Bridge St. Vacant residential lot	Public thoroughfare APN: 084-200-38
South	165 School St.	Residential	Manufactured Home	APN: 084-200-36
East	N/A 150 Virginia St.	None None	Virginia St. Vacant residential lot	Public thoroughfare APN: 084-200-93
West	N/A	None	School St.	Public thoroughfare

No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of current uses of adjoining properties.

## **Section 3: User-Provided Information**

---

The purpose of this section is to detail User-provided information used to help identify the possibility of RECs in connection with the Subject Property. User Questionnaires were provided to the User to assist them in compiling pertinent information. The Subject Property owner declined to complete the questionnaire. User-provided information is summarized below.

### **3.1 Owner, Key Subject Property Manager, or Occupant Provided Information**

According to the Washoe County Assessor, the Subject Property is currently owned by the Washoe County School District Board. The Subject Property, as observed during the site reconnaissance on July 3, 2023 is currently occupied by Natchez Gym.

### **3.2 Title Records, Environmental Liens or Activity and Use Limitations**

Reasonably ascertainable recorded land title records should be checked by the User to identify environmental liens or activity and use limitations, if currently recorded against the Subject Property. Environmental liens or activity and use limitations so identified are supposed to be reported to the Environmental Professional conducting the ESA. No evidence of environmental liens or activity and/or use limitations was discovered or brought to the attention of Broadbent.

No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of title records, environmental liens, or activity and use limitations.

### **3.3 Specialized Knowledge**

If the User has or is aware of any specialized knowledge or experience that is material to this ESA in connection with the Subject Property, it is the User's responsibility to communicate this information to the Environmental Professional. The User provided no specialized knowledge relative to the Subject Property.

No RECs, CRECs, and/or HRECs were noted relative to the Subject Property based on review of available specialized knowledge.

### **3.4 Valuation Reduction for Environmental Issues**

In a transaction involving the purchase of a parcel of real estate, if a User has actual knowledge that the purchase price of the Subject Property is significantly less than the purchase price of comparable properties, the User should try to identify an explanation for the lower price and to make a written record of such explanation. The User provided no information relative to valuation reduction relative to the Subject Property. No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of information relative to valuation reduction for environmental issues.

### **3.5 Reason for Conducting Phase I**

The purpose of this ESA was to identify existing or potential RECs, CRECs, and/or HRECs (as defined by ASTM Standard E1527-21) in connection with the Subject Property, and it is assumed to also be to qualify the User for Landowner Liability Protection (LLP) relative to potential CERCLA liability.

## **Section 4: Site Reconnaissance**

---

Mr. Brandon Reiff of Broadbent conducted a site reconnaissance of the Subject Property on July 3, 2023, as discussed below. Weather conditions at the time of the site reconnaissance were sunny and hot. The Subject Property was accessed via School St. adjacent west of the Subject Property. The site reconnaissance consisted of walking the perimeter of the Subject Property and conducting a visual survey of the exterior and interior building areas. It should be noted that the crawl space area below the building was not inspected due to this being classified as a confined space.

Adjoining properties were visually assessed from the Subject Property boundaries. Adjoining property information is discussed in Section 2.4. The inability to complete a thorough visual inspection of these areas does not represent a significant data gap. Photographs of the Subject Property and vicinity taken during the site reconnaissance are provided within Appendix B.

### **4.1 Hazardous Substances in Connection with Identified Uses**

Approximately four, five-gallon buckets of various paint and joint compound sealant was observed within the Subject Property building. No hazardous substances or petroleum products in connection with current identified uses were observed within the boundaries of the Subject Property during the site reconnaissance. No hazardous substances or petroleum products in connection with current identified uses were observed on properties adjoining the Subject Property when observed from the Subject Property or publicly accessible areas. As such, no RECs from hazardous substances or petroleum products in connection with current identified uses were known to be present on the Property at the time of the reconnaissance.

### **4.2 Hazardous Substance and Unidentified Substance Containers**

No hazardous substance, unidentified substance, or petroleum products containers were observed within the boundaries of the Subject Property during the site reconnaissance. No hazardous substance, unidentified substance, or petroleum product containers were observed on properties adjoining the Subject Property when observed from the Subject Property or publicly-accessible areas. As such, no RECs from hazardous substance or unidentified substance containers were known to be present on the Subject Property at the time of the reconnaissance.

### **4.3 Storage Tanks**

A manhole cover was observed related to a 1,000-gallon size septic tank on the Subject Property. The septic tank is permitted by the WCHD under Permit #3570. The permit date is listed as April 25, 2000. The septic permit from WCHD is provided in Appendix C.

Additionally, an apparent propane above ground storage tank (AST) was observed on the northern portion of the Subject Property. The propane AST capacity is estimated visually at 1,000 gallons. The AST is constructed of steel, and it is unknown if it is currently in use. The AST appears to be in good condition and no evidence of leakage was observed. No release has been documented on the Subject Property according to WCHD and/or NDEP. Photos of the septic tank and AST on the Subject Property are included in Appendix B.

No RECs from storage tanks were known to be present on the Subject Property at the time of the reconnaissance. No release has been documented, however, the potential for the AST, septic tank, and/or associated piping to fail exists, and therefore, it is classified as a potential REC.

#### **4.4 Polychlorinated Biphenyls**

Polychlorinated biphenyls (PCBs) are a class of stable compounds that are toxic to the liver and are linked to cancer. The US EPA considers PCBs a Priority Pollutant under the Clean Water Act. The maximum contaminant level of PCBs allowed in drinking water is 0.5 parts per billion (ppb). Due to PCBs' toxicity and classification as a persistent organic pollutant, the United States prohibited the manufacture of PCBs after July 1, 1979 in the Toxic Substances Control Act (TSCA) of 1976. Until then, PCBs were widely used as coolant and dielectric insulating fluids for oil-filled electrical transformers and capacitors (such as those used in ballasts of old fluorescent and high-intensity discharge lights). PCBs were also used as plasticizers in paints and cements, stabilizing additives in flexible polyvinyl chloride (PVC) coatings of electrical wiring and electronic components, pesticide extenders, cutting oils, reactive flame retardants, lubricating oils, vacuum pump fluids, hydraulic fluids, and sealants for caulking in schools and commercial buildings.

Although manufacture was prohibited after 1979, PCBs already in commerce continued to be allowed in "totally enclosed uses" such as transformers and capacitors. Due to their extended working life, some oil-filled electrical equipment may still contain PCBs. The US EPA considers a product to be "PCB-Contaminated" if the oil contains between 50-500 parts per million (ppm), and to be a PCB product if more than 500 ppm. After July 1, 1979 and through 1998, the US EPA required new oil-filled electrical equipment to be marked "No PCBs." If an item is not so labeled, and no information is available as to the date of manufacture, an item might be assumed to contain PCBs until proven otherwise. PCB content may or may not be a matter of record with equipment or transformers belonging to a utility company. No indication of leaks or releases from electrical equipment was observed during the site visit. No verifiable RECs, CRECs, and/or HRECs associated with PCBs were observed or known to be present on the Subject Property at the time of the site reconnaissance.

#### **4.5 Odors, Pools of Liquid**

No pools of liquids and/or standing surface water were observed within the boundaries of the Subject Property during the site reconnaissance. No strong, pungent, or noxious odors were noted during the site reconnaissance. No odors, pools of liquid, or standing surface water were observed on properties adjoining the Subject Property when observed from the Subject Property or publicly-accessible areas. As such, no RECs associated with potential odors, pools of liquid, or standing surface water were known to be present on the Subject Property at the time of the site reconnaissance.

#### **4.6 Pits, Ponds, Lagoons**

No pits, ponds, or lagoons were observed within the boundaries of the Subject Property during the site reconnaissance. No pits, ponds, or lagoons were observed on properties adjoining the Subject Property when observed from the Subject Property or publicly-accessible areas. As such, no RECs from pits, ponds, or lagoons were known to be present on the Subject Property at the time of the reconnaissance.

#### **4.7 Stained Soil/Pavement, Stressed Vegetation**

No stained soil/pavement or stressed vegetation were observed within the boundaries of the Subject Property during the Subject Property reconnaissance. No stained soil/pavement or stressed vegetation were observed on properties adjoining the Subject Property when observed from the Subject Property or publicly-accessible areas. As such, no RECs from stained soil/ pavement or stressed vegetation were known to be present on the Subject Property at the time of site reconnaissance.

#### **4.8 Indications of Solid Waste Disposal**

Solid waste generated at the Subject Property is disposed of in commercial dumpsters or recycled. An independent solid waste disposal/recycling contractor removes waste from the Subject Property. No evidence of illegal dumping of solid waste was observed during the site reconnaissance. As such, no RECs from solid waste disposal were known to be present on the Property at the time of the reconnaissance.

#### **4.9 Water, Storm Water, and Wastewater**

As discussed in Section 4.3, the Subject Property contains a 1,000-gallon septic tank buried on the Subject Property. The septic system on the Subject Property is currently in use. The septic permit from WCHD and additional construction documentation is provided in Appendix C.

## Section 5: Records Review

---

The purpose of a Records Review is to obtain and review records that will help identify RECs, CRECs, and/or HRECs in connection with the Subject Property. A discussion of each record source is provided below.

### 5.1 Physical Setting

Physical setting information for the Subject Property was obtained by a review of sources that included, but was not limited to, USGS topographic maps and a USDA soil survey report. Refer to Section 12 for a complete list of records reviewed.

#### 5.1.1 Topography

The USGS, 11881856 Wadsworth, NV Quadrangle 7.5-Minute series topographic map was reviewed for this ESA. The elevation of the Subject Property is approximately 4,067 feet above mean sea level. Topographic contour lines in vicinity of the Subject Property indicate that surface water generally drains towards the east-northeast.

#### 5.1.2 Surface Water Bodies

The Truckee River is approximately 200 feet east of the Subject Property. No surface water features were observed on the Subject Property. No on-site water wells or springs were observed during the Subject Property reconnaissance. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed on the Subject Property during this investigation.

#### 5.1.3 Geology and Hydrology

The Subject Property is located within the incorporated limits of Wadsworth, NV. The geological deposits of this area are described by the USGS as stratified sequences of quaternary alluvium. Based on the soil survey maps published by the USDA Soil Conservation Service (SCS), the Subject Property is predominately mapped as "Bluewing" which is a gravelly loamy sand soil texture. The Subject Property soil hydrologic group classification is Class A – High infiltration rates. Class A soils are "soils are deep, well drained to excessively drained sand and gravels."

Depth to groundwater is expected to be approximately 20 feet below land surface (BLS) in the area near and beneath the Subject Property, according to the Nevada Division of Water Resources on-line Well Log Database. The groundwater flow direction in the vicinity of the Subject Property is assumed to be toward the east (towards the Truckee River).

### 5.2 Historical Record Sources

The following standard historical sources may be used to meet the historical record sources review requirements of ASTM E1527-21: aerial photographs; fire insurance maps; property tax files; land title records (although these cannot be the sole historical source consulted); topographic maps; city directories; building department records; or zoning/land use records. ASTM E1527-21 requires "All obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier." This task requires reviewing only as many of the standard historical sources as are necessary and that are reasonably ascertainable and likely to be useful.

### 5.2.1 Historical Topographic Maps

The following historical topographic maps were reviewed and described. Copies of the historical topographic maps are provided in Appendix D.

<b>Date(s)</b>	<b>Map Source &amp; Scale</b>	<b>Subject Property Observations</b>	<b>Surrounding Area Observations</b>
1890	Wadsworth Quad 1:125000	Property is undeveloped.	Surrounding area is predominantly undeveloped. Roads are recorded south, east, and west of the Property. The Virginia & Truckee railroad and the town of Wadsworth are recorded south of the Property. The Truckee River is recorded adjacent east of the Property on this map.
1892	Wadsworth Quad 1:125000	No significant change.	No significant change.
1894	Wadsworth Quad 1:125000	No significant change.	No significant change.
1957	Wadsworth Quad 1:62500	Property is developed with current building structure.	School St., Bridge St., and Virginia St. are recorded adjacent to the Property. A school and the town of Wadsworth are recorded adjacent west of the Property. Highway 447 and a landing strip are recorded west of the Property.
1985	Wadsworth Quad 1:24000	No significant change.	The Southern Pacific Railroad and additional building structures are recorded west of the Property on this map. A trailer park is recorded east of the Property.
2014	Wadsworth Quad 1:24000	No significant change.	Surrounding area infrastructure and roadways appear to be developed in their current configuration on this map.
2018	Wadsworth Quad 1:24000	No significant change.	No significant change.

No RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of the historical topographic maps.

### 5.2.2 Historical Aerial Photographs

The following historical aerial photographs were reviewed and described. Copies of the historical aerial photographs are provided in Appendix D.

<b>Date(s)</b>	<b>Photo Source &amp; Scale</b>	<b>Subject Property Observations</b>	<b>Surrounding Area Observations</b>
1954	USGS 1" = 500'	Property is developed with current building structure.	Residential building structures are seen adjacent south and north of the Property. A school building is seen west of the Property. Highway 447 and Interstate 80 are seen in this photo. The Truckee River is adjacent east of the Property.
1956	USGS 1" = 500'	No significant change.	No significant change.
1974	USGS 1" = 500'	No significant change.	An apparent trailer park is seen east of the Property and Truckee River in this photo. Further development of apparent residential buildings is seen south of the Property in this photo.
1980	USDA 1" = 500'	No significant change.	Further development of apparent residential subdivision is seen southeast of the Property in this photo.
1994	USGS/DOQQ 1" = 500'	No significant change.	No significant change.
2006	USDA/NAIP 1" = 500'	No significant change.	No significant change.
2010	USDA/NAIP 1" = 500'	No significant change.	No significant change.
2015	USDA/NAIP 1" = 500'	No significant change.	Surrounding area buildings appear to be developed in their current configuration in this photo.
2019	USDA/NAIP 1" = 500'	No significant change.	No significant change.

No environmental RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of the historical aerial photographs.

### 5.2.3 Fire Insurance Maps

Fire insurance maps were initially produced by private companies (such as Sanborn, Perris, and the Fire Underwriters Inspection Bureau) for the insurance industry to provide information on the fire risks of buildings and other structures. Fire insurance maps have become a valuable historical resource for persons concerned with evaluating the potential for site contamination based on the history of past Subject Property use. Fire insurance maps are available for approximately 12,000 US cities and towns during the period from 1852 to the present. Map coverage is most comprehensive in urban core areas and in older suburbs. Map coverage is limited in suburban areas developed after 1950. Broadbent queried EDR's collection of fire insurance maps for coverage of the Subject Property.

Fire insurance maps depicting the Subject Property at the specified location were identified. A copy of the Certified Sanborn Map Report is provided in Appendix D.

<i>Date(s)</i>	<i>Map Source</i>	<i>Subject Property Observations</i>	<i>Surrounding Area Observations</i>
1897	Sanborn	Three residential dwelling building structures, two shed structures, and an outhouse are mapped on the Subject Property.	Forney St., Wadsworth Public School, and residential buildings are recorded adjacent west of the Subject Property. Residential dwelling structures are mapped adjacent north, south, and east of the Subject Property. Short St. is recorded adjacent north of the Subject Property. River Rd. and the Truckee River are mapped adjacent east of the Subject Property on this map.

No environmental RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of the historical fire insurance maps.

#### *5.2.4 City Directories*

City directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth-century directories are generally developed into three sections: a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be less comprehensive for rural areas and small towns.

Broadbent requested EDR to provide a search of available historical city directories that might list the Subject Property. EDR searched the Cole Information Directory and EDR Digital Archive listings for the following years: 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2020. City directory listings were unavailable for the Subject Property. Surrounding area is primarily listed as residential. A copy of the City Directory Report indicating no coverage available is provided in Appendix D.

No environmental RECs, CRECs, and/or HRECs were identified relative to the Subject Property based on review of the historical city directories.

### **5.3 Environmental Record Sources**

Broadbent contracted Environmental Data Resources, Inc. (EDR) to conduct a search of available state, federal, and other ascertainable environmental records. The area searched included the Subject Property and surrounding area within approximate minimum search distances from the Subject Property boundary, dependent on listing type, as defined by ASTM International. A complete listing of records searched is available in the EDR Radius Report provided in Appendix E. An abbreviated list of search results is provided in the table below relative to records that identified a regulatory listing relevant to the Subject Property. A subsequent discussion is provided relative to identified potential concerns.

<i>Standard Database List Per ASTM International</i>	<i>Subject Property Listed (Y or N)</i>	<i>Total # of Listings</i>	<i>Environmental Concern Posed to the Subject Property</i>
<b>Federal Agencies</b>			
Federal CERCLIS NFRAP SEMS ARCHIVE Sites (<0.5 mile)	N	1	N
<b>State Agencies</b>			
State & Tribal ASTs & USTs (<0.25 mile)	N	1	N
<b>Other Ascertainable Records</b>			
US Brownfields (<0.5 mile)	N	3	N
Indian Health Services (IHS) Open Dumps (<0.5 mile)	N	1	N
Indian Reservation (<1.0 mile)	N	1	N
US Mines (<0.25 mile)	N	2	N
Abandoned Mines (<0.25 mile)	N	1	N

Based on information contained within the EDR report, the Subject Property was not listed in any of the databases that were searched. Database results for properties surrounding the Subject Property are discussed below.

The EDR records search found one site within 0.5 miles of the Subject Property listed on the Superfund Enterprise Management Archive (SEMS-ARCHIVE). This site is identified as ‘Former Stead Air Force Base’ and is approximately 1,840 feet south-southwest of the Subject Property. The SEMS-ARCHIVE database tracks sites that have no further interest under the Federal Superfund Program based on available information. The Environmental Protection Agency (EPA) may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. According to the EDR, a preliminary environmental assessment was completed in October 1990, and the site was issued No Further Remedial Action Planned (NFRAP) status in April 1991. Given the site status, the potential for environmental impact from this site relative to the Subject Property appears low.

A review of the US Brownfields list, as provided by EDR, has revealed that there are three US Brownfield sites within approximately 0.5 miles of the Subject Property. The nearest US Brownfields site is approximately 1,000 feet south-southwest of the Subject Property. The site is identified as ‘Urrutia’. This site was used for residential purposes by non-tribal members prior to its acquisition by the PLPT. Brownfields grant funding was provided by the EPA to the PLPT to conduct a Phase I & Phase II ESA on the site. According to EDR, the Phase I assessment was completed on June 27, 2017 and indicated that remedial cleanup was required to address environmental concerns related to building materials (asbestos, lead-based paint, mold), drinking water, and indoor air. Subsequently, a Phase II ESA was conducted on September 29, 2017. The Phase II ESA confirmed the presence of asbestos, lead-based paint, and mold. Additionally, the drinking water contained iron and coliform impacts. No further information is provided in the EDR Report. Given the distance from the Subject Property, intervening gradient, and nature of the contaminants being primarily building materials, the potential for environmental impact to the Subject Property appears to be low.

The two other Brownfield site are related to the “Smith Site” located approximately 1,230 feet southwest of the Subject Property. The Smith Site is comprised of two contiguous parcels located at 319 Main Street, Wadsworth, NV 89442 (APN 084-160-79) and 385 Main Street, Wadsworth, NV 89442 (APN 084-160-89). Both parcels are located within the Pyramid Lake Paiute Reservation’s boundaries but are owned in fee simple. The site has been reportedly used to house an antique shop as well as for residential purposes (multi-family). Dirt from the former railroad properties located in the vicinity was reportedly used to grade parts of the site. One 500-gallon UST was reportedly excavated from the 319 Main Street parcel. There is potentially a heating oil UST of unknown volume at the 385 Main Street parcel. The buildings located onsite were presumably built with asbestos- and lead-containing materials due to their age of construction. Given the distance from the Subject Property, intervening gradient, and nature of the contaminants being primarily building materials, the potential for environmental impact to the Subject Property appears to be low.

One site within one mile of the Subject Property is listed on the Abandoned Mines and Mines database. This site is identified as “327 Apex Mine” and according to EDR is located approximately 535 feet west-southwest of the Subject Property. The mine was an underground metal mine which was abandoned on January 30, 2014. Given the site status and distance from the Subject Property, the potential for environmental impact from this site relative to the Subject Property appears low.

Another site within one mile of the Subject Property is listed on the US Mines database. This site is identified as “Lake Mountain Mining, LLC” and according to EDR is located approximately 535 feet west-southwest of the Subject Property. The US Mines database contains mine identification numbers issued for mines active or opened since 1971. The data also includes violation information. The mine status is listed as permanently abandoned in the EDR. Given the distance from the Subject Property and site status, the potential for environmental impact from this site relative to the Subject Property appears low.

Other sites listed in the table above, but not yet specifically discussed, do not likely pose a significant environmental concern relative to the Subject Property for one or more of the following reasons: distance from Subject Property; relative location to the Subject Property; operating UST facilities with no violations; UST facilities that are permanently out of service; site listing not indicative of a release but rather simply indicating that the site/facility may possess chemicals of concern (e.g. Tribal UST)).

#### **5.4 Vapor Intrusion**

Vapor intrusion occurs when chemicals volatilize and migrate from impacted soil and/or groundwater up into a building’s interior space. Vapor intrusion can pose a potential health threat to the occupants of the building, especially to sensitive populations such as the elderly and children.

Sites within the approximate minimum search distances of 1/3 of a mile for chemicals of concern and 1/10 of a mile for petroleum hydrocarbons were reviewed. Based on the regulatory status, the characteristics of the offsite suspect sources, and/or lack of documented groundwater plumes within the Subject Property vicinity, it is unlikely that vapor intrusion is of concern for the Subject Property.

#### **5.5 Other Environmental Records**

Broadbent contacted the Nevada Division of Environmental Protection (NDEP) with regard to reported environmental issues at the Subject Property. No environmental records were found in regard to the Subject Property.

File review of Washoe County Health Department’s (WCHD’s) septic records indicate that a 1,000-gallon septic tank was installed on the Subject Property on April 25, 2000. WCHD issued permit #3570 for the septic system

on the Subject Property. The septic permit and septic tank construction details from WCHD are provided in Appendix C.

## Section 6: Non-Scope Considerations

---

The following items are outside the scope of ASTM E1527-21 and were requested to be included by the client.

### 6.1 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones; Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the US EPA Action Limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

### 6.2 Asbestos-Containing Material

ACM is commonly found in buildings constructed prior to the 1980s. Since the building structure on the Subject Property was constructed in 1935 the potential exists for ACM. Subsequently, as discussed in Section 2.3., the presence of asbestos is identified as a Business Environmental Risk ("BER"). A BER is defined under the ASTM standard as "*a risk which can have a material environmental impact on the business associated with the current or planned use of [a property].*" BERs include issues or conditions such as the presence of asbestos, lead-based paint, radon, mold, wetlands, OSHA issues, regulatory compliance issues, and endangered species or cultural/archaeological issues.

The ASTM standard refers to ACM as a non-scope item. For ACM, should demolition and/or renovation activities be undertaken, then it is recommended that an Asbestos Demolition/Renovation Survey be completed and that all ACM that will be impacted by the demolition and/or renovation be properly abated to comply with federal and state regulations.

### 6.3 Lead-Based Paint

LBP is a hazard in residential properties constructed prior to 1978. Since the existing building on the Subject Property was constructed in 1935, the potential for LBP exists. Subsequently, BERs associated with LBP are identified for the Subject Property based on the following:

- Potential for presence of LBP;
- Unknown condition of structural materials potentially containing LBP; and
- Undetermined future use of the existing structure on the Subject Property

For LBP, it is recommended that any area to be disturbed be checked prior to disturbance to be in compliance with Nevada lead regulation requirements.

## **6.4 Mold**

Broadbent observed accessible areas of the Subject Property for significant evidence of mold growth; however this ESA should not be used as a mold survey or inspection. Additionally, this inspection was not designed to assess all areas of potential mold growth that may be affected by mold growth on the Subject Property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the Subject Property. No obvious indications of water damage or mold growth were observed during the site reconnaissance.

## **Section 7: Interviews**

---

The following interviews were conducted in accordance with the requirements of ASTM E1527-21.

### **7.1 Interviews with Past and Present Owners and Occupants**

Interviews were not provided by the owner, user/client, or tenants for the purposes of this ESA.

No RECs, CRECs, and/or HRECs were noted relative to the Subject Property based on review of information gathered via interviews.

### **7.2 Interviews with State and/or Local Government Officials**

Broadbent contacted the Nevada Division of Environmental Protection (NDEP) with regard to reported environmental issues at the Subject Property. No environmental records were found in regard to the Subject Property.

File review of WCHD's septic records indicate that a 1,000-gallon septic tank was installed on the Subject Property on April 25, 2000. WCHD issued permit #3570 for the septic system on the Subject Property.

## **Section 8: Data Gaps**

---

A data failure is failure to achieve the historical research objectives of ASTM E1527-21. A data gap is the incompleteness in activities required in this practice. The following data gaps occurred during conduct of this ESA: recorded land title records were not provided by the client, no Property owner/representative interviews were obtained or questionnaire provided, City Directory search returned no coverage of the Subject Property, County and City development records were not reviewed, and aerial photographs only go back to 1954 (not 1940 as recommended in the ASTM Standard).

Based on the experience and good faith efforts of the environmental professionals responsible for conducting and reviewing this ESA, the above data gaps do not constitute a data failure and are not significant enough to affect identification of recognized environmental conditions on the Subject Property.

## Section 9: Findings

Findings of the ESA have been discussed throughout the body of this report and are tabulated below.

<i>Report Section</i>		<i>REC (Y/N)</i>	<i>CREC (Y/N)</i>	<i>HREC (Y/N)</i>	<i>De Minimis Conditions (Y/N)</i>	<i>Comments</i>
2.0	Site Description	N	N	N	N	The Subject Property building is currently a gymnasium.
3.0	User-Provided Information	N	N	N	N	The Subject Property is currently a gymnasium.  No known environmental liens or contamination.
4.0	Site Reconnaissance	N	N	N	N	Septic system located on the Subject Property.  Approximate 1,000-gallon propane AST is located on the Subject Property.
5.2	Historical Records	N	N	N	N	The Subject Property building was constructed in 1935.
5.3	Regulatory Records	N	N	N	N	No known releases and/or environmental cases are associated with the Subject Property at the time of this report.
5.4	Vapor Intrusion	N	N	N	N	None.
5.5	Other Environmental Records	N	N	N	N	No known environmental liens or contamination.  Active septic system on the Subject Property.
6.0	Non-Scope Considerations	N	N	N	N	BERs associated with asbestos-containing material (ACM) and lead-based paint (LBP) are identified for the existing building on the Subject Property.
7.0	Interviews	N	N	N	N	No known environmental contamination or liens.

As indicated above, this assessment has revealed no RECs, CRECs, or HRECs in connection with the Subject Property. However, this ESA has revealed an active 1,000-gallon septic tank and ~1,000-gallon propane tank associated with the Subject Property.

Additionally, this assessment has revealed non-scope business environmental risks (BERs) in connection with the Subject Property. BERs associated with asbestos-containing material (ACM) and lead-based paint (LBP) are identified for the existing building on the Subject Property based on the following:

- Age of the buildings and the potential for presence of ACMs and/or LBP;
- Unknown condition of structural materials potentially containing ACMs and/or LBP.

## Section 10: Conclusion

---

Broadbent has conducted this ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the Subject Property located at 200 School St., Washoe County Assessor Parcel Number 084-200-37 in Wadsworth, Nevada. Exceptions to, or deviations from, this practice are described in Section 1.4 of this report. This assessment has revealed no recognized environmental conditions in connection with the Subject Property. However, this assessment has revealed non-scope business environmental risks (BERs) in connection with the Subject Property. BERs associated with asbestos-containing material (ACM) and lead-based paint (LBP) are identified for the existing building on the Subject Property based on the following:

- Age of the buildings and the potential for presence of ACMs and/or LBP;
- Unknown condition of structural materials potentially containing ACMs and/or LBP.

For ACM, should renovation and/or demolition activities be undertaken, then it is recommended that an Asbestos Demolition/Renovation Survey be completed and that all ACM that will be impacted by the demolition and/or renovation be properly abated to comply with federal and state regulations. For LBP, it is recommended that any area to be disturbed be checked prior to disturbance to be in compliance with Nevada lead regulation requirements.

## **Section 11: Limitations & Exceptions of Assessment**

---

Broadbent prepared this report for the exclusive use of the Pyramid Lake Paiute Tribe. This ESA is based on review of the site description, User-provided information, readily ascertainable environmental records, and results of site reconnaissance and interviews. This ESA was conducted in accordance with generally accepted environmental practices and procedures, as of the date of the report. Reputable environmental professionals practicing in this or similar localities conducted the services employing a degree of care and skill ordinarily exercised under similar circumstances. Findings and conclusions were made using methodologies employed per ASTM International Practice E1527-21 described by ASTM International as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying RECs. No other warranties are implied or expressed.

No environmental sampling and associated analyses were undertaken for this ESA report. It is possible that variations in conditions could exist beyond points explored in this investigation.

This report represents professional opinion and judgment, which are dependent upon information obtained during the performance of consulting services. Environmental conditions may exist at the Subject Property that cannot be identified. Conclusions are based, in part, on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed. No investigation can be thorough enough to exclude the presence of hazardous materials at a given site; therefore, if no hazardous materials are identified during an assessment, such a finding should not be construed as a guarantee of the absence of such materials on a property, but rather the results of services conducted within project scope, cost, and other real limitations.

Opinions presented apply to conditions existing at the time services were conducted. Broadbent is unable to report on, or accurately predict events that may impact the Subject Property following performance of the described services, whether occurring naturally or caused by the actions of others. Broadbent assumes no responsibility for conditions it is not authorized to investigate or conditions not generally recognized as environmentally unacceptable at the time services are conducted. Broadbent is not responsible for change in applicable environmental standards, practices, laws, or regulations following performance of services.

## Section 12: Certification Statement & Signatures

---

As required by 40 CFR Part 312.10(b), I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and conducted the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. My qualifications as an Environmental Professional are presented within Appendix F.

**APPENDIX C**

OTHER ENVIRONMENTAL REPORTS

**GENERAL NOTES**

1. All existing improvements including utilities, fences, walls, etc. must be protected during construction. Any damage to existing facilities shall be the responsibility of the contractor. The contractor must also verify existing grades. Any deviation of more than 0.1' from the existing grades shown on the plans will require design review. Grading must conform to U.S.C. requirements.
2. Testing, inspection and certification are required by Washoe County. The owner shall retain the services of a geotechnical company for this work.
3. Irrigation and landscaping designs are by others.
4. Underground utilities are not shown on this plan. Two days before you dig call USA toll free at 1-800-227-2800 for utility locations.
5. During construction dust control must be provided according to Washoe County regulations. Erosion control and slope stabilization shall be provided per Washoe County Health requirements. Details for erosion control shall be provided by the contractor.

**SEPTIC SYSTEM NOTES**

1. All work shall be done in conformance with these plans, specifications and design details including Washoe County District Board of Health Regulations governing sewage, wastewater, and sanitation.
  2. Good construction techniques are essential if the system is to function properly. The following techniques must be considered
- SITE PREPARATION**
- a. Vehicular traffic over the disposal area will be prohibited to avoid soil compaction.
  - b. Reference stakes will be offset from the grading operations for proper orientation of the system and inspection purposes.
- DISTRIBUTION NETWORK PLACEMENT**
- a. Careful placement of the coarse aggregate is required. Uniform pipe slope is critical for effluent distribution.
  - b. At least 2" of aggregate will be placed over the crown of the pipe. A suitable backfill barrier covers the aggregate (see section).

**Subject: Percolation Tests for Assessor Parcel 084-200-37  
Lincoln Highway, Wadsworth, Nevada**

Dear Chip,

As requested, I have performed percolation tests at the above referenced parcel, Washoe County School District parcel, within Wadsworth Townsite. This property is shown as about 0.739 acres on current Washoe County Assessor's maps.

The purpose of the investigation was to:

- (1) Determine the percolation rate of the native soils at a possible disposal field repair.
- (2) Provide general design recommendations for a repair septic system.

The parcel is located in Section 3, Township 20 North, Range 24 East. The existing ground in the area of our testing slopes toward the east at grades of about 1 percent. During our percolation testing ground water was not evident.

Surface water, ground water or perched ground water was not encountered. I believe ground water is at considerable depth in this area.. Washoe County standard percolation tests were performed in the test pit. Below is a summary of the test results.

Percolation tests were performed at two levels in Test Pit #1 (see site sketch). Below is a summary of the test results. All test results, field notes and soil log are attached.

<u>TEST HOLE</u>	<u>DEPTH</u>	<u>SOIL TYPE</u>	<u>PERCOLATION RATE</u>
T-1	1.3 feet	Tan colored sand, gravel	1.7 min./inch
T-2	2.1 feet	Tan colored sand, gravel	6.2 min./inch

Anderson & Associates  
Engineering

Based on my percolation test results, and logs of native soils, I believe a standard Washoe County disposal system may be designed for this parcel. Percolation test results were within the limits of percolation rates acceptable for Washoe County standard septic systems.

### PRELIMINARY TRENCH DIMENSIONS

Assumed Design load	1000 gallons per day
Design percolation rate	10 minutes per inch
Depth of trench	3.5 feet maximum
Effective sidewall area per foot of trench (min.)	5 square feet
Minimum side wall required	633 square feet
Width of trench	2.0 feet
Length of trenches (total)	3 @ 43 feet minimum

### SITE DESIGN RECOMMENDATIONS

- 1) Surface runoff must be directed away from the septic system by the use of swales or another method.
- 2) The final design layout must be according to all applicable regulations including well setbacks, slope constraints, easement setbacks, building setbacks, property line setbacks, grading and drainage constraints, etc. Also, soil conditions throughout the disposal field area must be verified by the design engineer.
- 3) Actual fixture units must be used for the final design calculations.

If you have any questions please call.

Sincerely,

Ronald J. Anderson, P.E.  
Civil Engineer

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**Search Results:**

<u>Year</u>	<u>Scale</u>	<u>Details</u>	<u>Source</u>
2019	1"=500'	Flight Year: 2019	USDA/NAIP
2015	1"=500'	Flight Year: 2015	USDA/NAIP
2010	1"=500'	Flight Year: 2010	USDA/NAIP
2006	1"=500'	Flight Year: 2006	USDA/NAIP
1994	1"=500'	Acquisition Date: June 21, 1994	USGS/DOQQ
1980	1"=500'	Flight Date: August 10, 1980	USDA
1974	1"=500'	Flight Date: July 04, 1974	USGS
1956	1"=500'	Flight Date: November 25, 1956	USGS
1954	1"=500'	Flight Date: September 01, 1954	USGS

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/26/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 04/06/2023 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

ABANDONED MINES: An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

A review of the ABANDONED MINES list, as provided by EDR, and dated 03/17/2023 has revealed that there is 1 ABANDONED MINES site within approximately 0.25 miles of the target property.

US BROWNFIELDS:

Name: SMITH SITE 1  
 Address: 319 MAIN STREET  
 Recipient name: Pyramid Lake Paiute Tribe  
 Grant type: Section 128(a) State/Tribal  
 Region: 9  
 Property Number: 084-160-79  
 Parcel size: 0.7  
 Latitude: 39.63142498  
 Longitude: -119.289663  
 HCM Label: Not reported  
 Map Scale: Not reported  
 Point of Reference: Not reported  
 Highlights:

The Smith Site is comprised of two contiguous parcels located at 319 Main Street, Wadsworth, NV 89442 (APN 084-160-79) and 385 Main Street, Wadsworth, NV 89442 (APN 084-160-89). Both parcels are located within the Pyramid Lake Paiute Reservation's boundaries but are owned in fee simple. The site has been reportedly used to house an antique shop as well as for residential purposes (multi-family). Dirt from the former railroad properties located in the vicinity was reportedly used to grade parts of the site. One 500-gallon UST was reportedly excavated from the 319 Main Street parcel. There is potentially a heating oil UST of unknown volume at the 385 Main Street parcel. The buildings located onsite were presumably built with asbestos- and lead-containing materials due to their age of construction.

Highlights: The Smith Site is comprised of two contiguous parcels located at 319 Main Street, Wadsworth, NV 89442 (APN 084-160-79) and 385 Main Street, Wadsworth, NV 89442 (APN 084-160-89). Both parcels are located within the Pyramid Lake Paiute Reservation's boundaries but are owned in fee simple. The site has been reportedly used to house an antique shop as well as for residential purposes (multi-family). Dirt from the former railroad properties located in the vicinity was reportedly used to grade parts of the site. One 500-gallon UST was reportedly excavated from the 319 Main Street parcel. There is potentially a heating oil UST of unknown volume at the 385 Main Street parcel. The buildings located onsite were presumably built with asbestos- and lead-containing materials due to their age of construction.

**SMITH SITE 2 (Continued)**

**1026655336**

Dirt from the former railroad properties located in the vicinity was reportedly used to grade parts of the site. One 500-gallon UST was reportedly excavated from the 319 Main Street parcel. There is potentially a heating oil UST of unknown volume at the 385 Main Street parcel. The buildings located onsite presumably contain asbestos- and lead-containing materials due to their age of construction.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency

### ***Lists of state and tribal brownfield sites***

#### BROWNFIELDS: Project Tracking Database

Brownfields sites included in the Project Tracking Database. The term "brownfields" is used to describe abandoned, idled, or underused industrial or commercial properties taken out of productive use because of real or perceived risks from environmental contamination. The State of Nevada has initiated Brownfields, a land-recycling program, to provide an opportunity to redevelop these undesirable properties and revitalize communities.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

	Data Release Frequency: Varies

### US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 03/13/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2023	Telephone: 202-566-1917
Date Made Active in Reports: 05/30/2023	Last EDR Contact: 06/20/2023
Number of Days to Update: 70	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 05/01/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 08/14/2023
	Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: 703-416-0223
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 06/02/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 09/11/2023
	Data Release Frequency: Annually

## RMP: Risk Management Plans

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/04/2022	Telephone: 202-564-8600
Date Made Active in Reports: 05/10/2022	Last EDR Contact: 06/12/2023
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/31/2023
	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## COUNTY RECORDS

### WASHOE COUNTY:

#### UST - WASHOE: Underground Storage Tank in Washoe County

A listing of underground storage tank sites located in Washoe County.

Date of Government Version: 08/03/2020	Source: Washoe County Department of Environmental Health
Date Data Arrived at EDR: 08/05/2020	Telephone: 775-328-2493
Date Made Active in Reports: 08/11/2020	Last EDR Contact: 05/18/2023
Number of Days to Update: 6	Next Scheduled EDR Contact: 09/04/2023
	Data Release Frequency: No Update Planned

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Version Date:	2018
South Map:	11881762 FERNLEY WEST, NV
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
WADSWORTH NE	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Bluewing

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel.	Max: 705 Min: 141	Max: 9 Min: 7.9
2	7 inches	59 inches	sr to very gravelly sand to extremely gravelly loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel.	Max: 705 Min: 141	Max: 9 Min: 7.9

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: Alluvial land

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 23 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 7.4
2	3 inches	59 inches	sr to gravelly coarse sand to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 7.4

### Soil Map ID: 3

Soil Component Name: Patna

Soil Surface Texture: sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	5 inches	24 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	24 inches	42 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
4	42 inches	59 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

### Soil Map ID: 4

Soil Component Name: Swingler

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	5 inches	59 inches	sr to sandy loam to silty clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

### Soil Map ID: 5

Soil Component Name: East Fork

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	11 inches	40 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	40 inches	59 inches	sr to sand to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Natural Heritage Program

Telephone: 775-684-2900

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Nevada Well Log Database

Source: Dept of Conservation and Natural Resources, Division of Water Resources

Telephone: 775-687-4380

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Source: Nevada Bureau of Mines and Geology

Telephone: 775-784-6691

Oil and gas well locationS in the state of Nevada.

### RADON

#### State Database: NV Radon

Source: State Health Division

Telephone: 775-687-7531

Radon Test Results By Zip Code

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

#### NOTE:

Attached is your official certificate attesting to your certification. Also attached are two (2) pocket cards. Upon request of the Division, client or potential client, a holder of a certificate shall present his certificate for inspection (NAC 459.9729). A pocket card will suffice as proof of certificate at job sites.

You will receive only one (1) notification of expiration and renewal for your certification. It is the certified individual's responsibility to ensure his or her renewal is submitted in a timely manner. There is no grace period (NAC 459.9727).

Any address changes should be forwarded to the Certification coordinator at:

Bureau of Corrective Actions  
901 S. Stewart Street, Suite 4001  
Carson City, NV 89701-5249
